

FI contd

posts and shelves carried thereby. The mechanism is mounted in the corner of the cabinet interior. To fit the mechanism within the cabinet, a height adjustment device is formed by positioning the second upper post in the upper end of the first lower post for slidable movement therebetween. When securement of the two joined posts and mounted shelves is desired, the slidably movable second upper post is extended upwardly until it engages the upper mounting bracket. An elongated recess in the second upper post aligns with an opening in the first lower post, and a threaded member extends into a casting positioned within the upper post. The ~~screw~~ ^{threaded member} is tightened to engage the casting and secure the two posts in a shelf-retaining and rotational mode. The height adjustment device enables quick and efficient installation of the mechanism within the cabinet interior. The mechanism also includes a one piece shelf construction having a post-securing section and a shelf-retaining pin.

In the Specification:

Please delete the last paragraph on page 6 and replace it with the following paragraphs:

F2 Fig. 3a is a perspective view of the joined posts shown in Fig. 2;

Fig. 3b is a top plan view of the joined posts shown in Figs. 2 and 3a;

Please delete the 2nd paragraph on page 8 and replace it with the following paragraph:

F3 Fig. 16 is a view similar to that shown in Fig. 15 with the spring being disengaged to free the shelves for movement;

Please delete the 4th paragraph on page 8 and replace it with the following paragraph:

F4 Fig. 18 is an end elevational view of the rolled pin shown in Fig. 17.

Please delete the fourth full paragraph on page 11 and replace it with the following paragraph:

F5 Post-securing shelf section 62 is made up of a circular hub 48 (Fig. 14) which houses within its formed interior 58 the plurality of radially extending ribs 45 emanating from a post encircling sleeve 54. Two pin-receiving indents 56 cooperatively open into sleeve ~~66~~⁵⁴ so that a pin inserted through post 22 (Fig. 14) will nest within indents 56 and be within the interior hub 48 and post 22.

Please delete the last paragraph starting on page 11 and ending on page 12 and replace it with the following paragraph:

F6 Thus, the one piece shelf 20 can be positioned over post 22 as shown in Fig. 14 and sustained at a predetermined location by the insertion of a pin through an aperture 63 in post 22 with the extending ends of the pin cooperatively received by indents ~~68~~⁵⁶ to secure the shelf at a precise location on post 22.

Please delete the last full paragraph on page 12 and replace it with the following paragraph:

F7 Fig. 16 illustrates the positioning of clip 78 as it is urged against post 34 and into apertures 82, 84, and Fig. 15 shows clip 78 in the final engaged and
